

Specialists in digital supply chain cyber risk, cybersecurity, governance and compliance.

M516 Cyber Solutions Ltd is a specialist cybersecurity consultancy helping organisations identify, assess and manage cyber risk across their third-party ecosystem through strategic advisory, independent assurance and bespoke cyber solutions.

We advise. We assure. We build.

Our team

Our team combines front-line practitioners from financial services, energy and technology, holding certifications including CISSP, CCSP and ISO 27001 Auditor accreditation, and trained in Ethical AI. Together, we bring more than 20 years of combined cybersecurity, compliance and data protection experience to every engagement.

Four specialisms, one connected practice

Digital Supply Chain Cyber Risk, Cybersecurity, Governance and Compliance — organised around the decisions you need to make.

Digital Supply Chain Cyber Risk

Know exactly where your suppliers put you at risk — and keep watching, not just once a year.

- Third-Party Cyber Risk Assessments
- Continuous Third-Party Risk Monitoring
- Cyber Governance, Procurement & Controls Mapping
- Board-Level Cyber Risk Reporting

Governance

Set clear rules for how risk, data and AI are handled — inside your business and across your suppliers.

- AI Governance & Responsible Adoption
- Data & Privacy Governance
- Cyber Strategy & Governance

Cybersecurity

Understand your own security posture, strengthen it, and build your team's confidence to manage it.

- Cyber Maturity Benchmarking
- Bespoke Cyber Solutions
- Technology Obsolescence & Legacy Risk
- Operational Resilience Management
- Training & Capability Development

Compliance

Make sense of the regulations that apply to you, and close the gaps before they become a problem.

- Regulatory & Compliance Advisory
- Compliance Readiness

Building trusted, resilient and secure digital supply chains

Cyber risk doesn't stop at your organisation. Neither do we.

Every organisation today depends on suppliers, software vendors and partners it doesn't fully control — and any one of them can become a way in for cyber risk. M516 helps you see that risk clearly, prove you're managing it, and build the capability to stay ahead of it.

Our mission

To help every organisation build a digital supply chain it can trust — secure, resilient, and able to withstand disruption.

Our vision

A future where managing risk across your suppliers feels as clear and confident as managing your own.

Our values

Independent and evidence-led — we say what we find, and build only what genuinely reduces risk.

15+

Years' front-line cybersecurity experience

10+

Years in global financial services

200+

Third-party risk assessments conducted

20+

Years' combined team compliance experience

What we do

Three connected capabilities that take you from strategy, through independent validation, to a working solution.

Advisory

We help you set the right cyber strategy and put clear ownership behind it.

Assurance

We check, independently, that the risk in your supply chain is really under control.

Solutions

We build the tools and dashboards that make it easy to keep it that way.

We advise. We assure. We build.

UK-headquartered, working with organisations across the UK and internationally.

A clear path to sustained assurance

Discover

A short conversation to understand your supplier landscape and immediate risk questions.

Assess

Scope and deliver the right assessment or review, with clear deliverables and a fixed timeline.

Build

Where needed, design and implement the governance, monitoring or bespoke solution that closes the gap.

Sustain

Maintain visibility through continuous monitoring, reporting and advisory support.

Who we work with

Cybersecurity isn't sector-specific. We work with organisations in every industry, wherever your business depends on suppliers, partners or technology — with particular depth in **Financial Services, Healthcare, Retail & E-commerce, Professional Services, Legal, Insurance, Energy, Government** and **Private Sector**.

What sets M516 apart

■ Specialism, not generalism

Supply chain and third-party cyber risk is the whole practice, not one service line among many.

■ Built capability, not just findings

Bespoke dashboards, scoring models and workflow automation delivered alongside the advice.

■ Lifecycle coverage

Engaged from procurement through offboarding, rather than a single point-in-time audit.

■ Board fluency

Reporting and language built for executive and board consumption, not just technical teams.

Start with a conversation about your supplier landscape.

A short, no-obligation discovery call to understand your risk profile and where to start.
